CLEANER/DEGREASER

Organic Choice Cleaner/Degreaser is the most **environmentally safe** cleaning product on the market today. It is water based and is considered non-hazardous by OSHA. None of the ingredients are hazardous, carcinogenic or banned chemical agents. It contains no di-lymanine or other combustibel citrus or orange based chemicals.

Organic Choice Cleaner/Degreaser is non-flammable, non-combustible, and is 100% Readily Biodegradable (meaning that 100% of it breaks down into water and carbon dioxide in 27 days). No special disposal methods are needed.

Organic Choice Cleaner/Degreaser can replace hazardous solvents and cleaning products in your home or business.

Organic Choice Cleaner/Degreaser also removes mildew.

OC CLEANER/DEGREASER IS THE ONLY
CLEANING PRODUCT EVER TO RECEIVE THE
GREEN SEAL OF APPROVAL
FOR ENVIRONMENTAL SAFETY FOR BOTH
HOUSEHOLD AND INDUSTRIAL USE.

CLEANER/DEGREASER

Organic Choice Cleaner/Degreaser will clean any washable surface without the need for rinsing. It will remove many stains including, but not limited to blood, grass, ink, oil, grease, graphite, carbon and dirt easily. For home use, it can be used to clean cars, carpets, home exteriors, flooring, laundry, kitchen work areas and appliances, windows and bathrooms.

FOR THE FIRST TIME EVER, WE DON'T HAVE TO CHOOSE BETWEEN A CLEAN INDOOR ENVIRONMENT AND A POLLUTED OUTDOOR ENVIRONMENT.

Many cleaning products today say that they are biodegradable, and in fact they are, loosely speaking. Actually, everything on Earth is biodegradable, even if that biodegradation process takes 500 years! Don't be fooled by the term biodegradable - look for the:

100% Readily Biodegradable classification for safety.

100% Readily Biodegradable means that 100% of the product must break down into non-toxic substances in less than 45 days.

100% of Organic Choice Cleaner/Degreaser breaks down into carbon dioxide and water in 27 days.

DON'T BE FOOLED BY THE TERM "NATURAL" ON A CLEANING PRODUCT LABEL.

The term "Natural", does not necessarily mean non-toxic. Many of the cleaners that call themselves "natural" are combustible, and require disposal in only approved dumps. Just because di-limonene, the active ingredient in the orange cleaners is derived from the orange peel, does not mean that it is non-toxic. Read the label.

Organic Choice Cleaner/Degreaser is very inexpensive to use when you realize that:

One 32 oz bottle of concentrate will make up to:

16 gallons of All Purpose Household Cleaner

OR

64 gallons of Window Cleaner

DILUTIONS FOR HOUSEHOLD USE:

General Purpose Household Use: 2-4 ounces (equal to 1/4-1/2 cup) per gallon of water.

Windows: 1/2 ounce (equal to 1 tablespoon) per gallon of water.

Floor Cleaning: (wood or tile) 1 ounce (equal to 2 tablespoons) per gallon of water.

Walls: 2 ounces (equal to 1/4 cup) per gallon of water.

Carpet Shampoo: 2-4 ounces (equal to 1/4 to 1/2 cup) per gallon of water. Add a de-foaming agent.

Upholstery: 1 ounce (equal to 2 tablespoons) per gallon of water.

Spot Cleaning Fabrics: 2 ounces (equal to 1/4 cup) per gallon of water.

Painted Or Treated Concrete Floors: 2 ounces (equal to 1/4 cup) per gallon of water.

Laundry: 8 ounces (equal to 1 cup) per large load of clothes.

Untreated Concrete (driveways, walkways or garage floors): 4-8 ounces (equal to 1/2 to 1 cup) per gallon of water.

FIRST AID:

Eyes: Flush eyes with cool water.

External: Rinse with cool water

Internal: Do Not induce vomiting. Drink large amounts of water or milk.
